

Part 2

2.1 ANU Medical School Academic Supervisor Endorsement

I confirm that I have discussed this application with the applicant, considered the achievements of the applicant in relation to School, College and University standards, and I have provided a statement below outlining my support for their application for academic title within the ANU Medical School (one half A4 page maximum).

Research (including Research Engagement/ Service)

Robert has been active in supervising medical students in their research projects – approximately one student each 2 year cycle.

He has been a member of the ACT Health HREC Clinical Trials Subcommittee from at least 2010.

He is becoming involved in the Our Health in Our Hands (OHIOH) Type 1 Diabetes Cohort project. He is expecting to be very much more involved in the OHIOH project as it develops momentum. This project is integrating research into a clinical care setting.

Education (including Teaching, Education Engagement/ Service)

Robert contributed to Block 3 curriculum development at the start of ANUMS and would be happy to be involved in reviewing the PBLs.

He is a contributor to CBL tutoring- x 2 per year.

He delivers x4 lectures to Phase 1 students each year.

He provides face to face teaching to 3rd year students attached to endocrinology.

Service Engagement (includes Service to the School, College and University)

Robert's service is very much related to clinical endocrinology at The Canberra Hospital through his 0.25 FTE appointment and ward service activities. He is actively engaged in training of the Endocrine Advanced Trainees and junior doctors. He runs the Endocrinology CME program.

Overall Robert contributes well to ANUMS relative to his part-time appointment at CHS. He is likely to increase his research activities due to involvement in the OHIOH project over the next few years.
