I fly my drone
safely

I fly safely because

- I know and comply with the laws
- I have complete control of my drone
- I respect other people's privacy
- I am not a danger to people or animals
- I do not fly in nature reserves
- I check with the local authorities about any flying restrictions
- I avoid other aircraft in good time
- I am properly insured

Without permission, I never fly

- Closer than 5 km to airfields and heliports
- More than 150 m above the ground in control zones
- Close to where emergency services are working
- Over or less than 100m from groups of people
- Unless I have direct eye contact with the drone
- An aircraft that weighs more than 30 kg in flight
